

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	29 June2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User Authentication	Add Financial Details (Income, Expenses, Savings) Update Financial Profile View Financial Summary
FR-4	Financial Profile Management	Add Financial Details (Income, Expenses, Savings) Update Financial Profile View Financial Summary
FR-5	AI Financial Assessment	Analyze User Financial Data Generate Personalized Financial Relief Recommendations Provide Budgeting Tips
FR-6	Relief Scheme Recommendation	Display Eligible Government/NGO Relief Schemes Search and Filter Schemes View Eligibility Criteria

FR-7	Application Management	Apply for Relief Schemes Upload Required Documents Track Application Status
FR-8	AI Chatbot Assistance	Ask Financial Queries Receive AI-Based Guidance 24x7 Chat Support
FR-9	Notifications	Email Notifications Application Status Alerts Scheme Deadline Reminders
FR-10	Feedback and Support	Submit Feedback Rate AI Recommendations Contact Support Team
FR-11	Admin Dashboard	Manage Users Manage Relief Schemes Monitor Applications View Analytics and Reports

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The platform should have an intuitive, user-friendly interface that is easy to navigate for users of all technical skill levels.
NFR-2	Security	Protect user data using encryption, secure authentication, role-based access control, and compliance with data privacy standards.
NFR-3	Reliability	The system should consistently provide accurate recommendations and maintain stable operation

		with minimal failures.
NFR-4	Performance	The application should process AI recommendations and user requests quickly, with page response times ideally under 3 seconds.
NFR-5	Availability	The system should be accessible 24×7 with high uptime (e.g., 99.9%) to ensure uninterrupted service.
NFR-6	Scalability	The platform should support increasing numbers of users, financial records, and AI requests without significant performance degradation.
