

Project Design Phase
Proposed Solution Template

Date	29 June 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many individuals and small businesses struggle with debt due to poor financial planning, lack of personalized guidance, and limited access to affordable financial counseling. Existing debt management services are often expensive, generic, and do not provide real-time assistance, leading to financial stress and increased loan defaults.
2.	Idea / Solution description	Develop an AI-powered platform that helps users manage debt, improve financial health, and create personalized recovery plans. The platform analyzes income,

		expenses, loans, and repayment history using AI to recommend optimal repayment strategies, budgeting plans, credit improvement tips, and financial goals. It also provides chatbot-based financial counseling, payment reminders, spending analysis, and predictive insights to prevent future debt.
3.	Novelty / Uniqueness	The platform combines Artificial Intelligence, predictive analytics, and personalized financial planning into a single solution. Unlike traditional debt counseling services, it offers real-time AI recommendations, automated budgeting, personalized debt prioritization, credit score improvement suggestions, and 24/7 virtual financial assistance. Machine learning continuously improves recommendations based on user behavior
4.	Social Impact / Customer Satisfaction	The platform combines Artificial Intelligence, predictive analytics, and personalized financial planning into a single solution. Unlike traditional debt counseling services, it offers real-time AI recommendations, automated budgeting, personalized debt prioritization, credit score improvement suggestions, and 24/7 virtual financial assistance. Machine learning

		continuously improves recommendations based on user behavior
5.	Business Model (Revenue Model)	Revenue can be generated through premium subscription plans, partnerships with banks and financial institutions, referral commissions for loan refinancing and insurance products, financial planning services, and enterprise solutions for banks and fintech companies. A freemium model can attract users, with advanced AI features available through paid subscriptions.
6.	Scalability of the Solution	The cloud-based AI platform is highly scalable and can support millions of users across different regions. New features such as investment planning, tax assistance, fraud detection, multilingual support, and integration with banking APIs can be added easily. The platform can also be expanded for use by financial institutions, credit unions, and government financial assistance programs.
